

GENERAL INFORMATION

- This product must be installed by a qualified plumber.
- Not suitable for use with gravity-fed systems.

To ensure optimum performance and customer satisfaction please adhere to the following:

- Flush out all pipe work prior to installations

Installations should comply with relevant local authority requirements:

- Maximum hot water temperature 75°C
- Recommended minimum working pressure 150kPa
- Recommended maximum working pressure 500kPa

If the working pressure exceeds or is likely to exceed 500kPa, an approved pressure limiting valve must be fitted. If the temperature exceeds 75°C, an approved tempering valve must be fitted.

MAINTENANCE AND CARE

To look after your ABI Tapware you should:

Regularly clean with mild liquid detergent or soap and water.

NOT use cream cleansers or bleach. These substances are abrasive.

NOT use cleaning agents as they may damage the surface.

Failure to comply with the above may void all warranties.

Please note that this warranty covers only manufacturing defects and is limited to free replacement of products of components (excluding consequential losses).
